People get sick because they go away from Nature, and the only way to get well is to go back. Something grows out of the ground in the form of vegetation to cure almost every ill. Some of these vegetable growths are understood by man, and some are not. Animals, it would seem, know what to do when they are sick better than men and women. Observers have noted that a sick horse, dog or cat will stop eating food and seek out some vegetable growth in the field or yard, which, when found and eaten, often restores appetite and health. Winning the War in the Kitchen

Saving Time, Energy and Labor-Providing Extra Hours For War Work

It is every woman's patriotic duty not only to save food but to give a part of each day to some other form of war work. To provide the time, you should have such time-saving, labor-saving kitchen equipment as the Hoosier Cabinet. The Hoosier is becoming more important every day, due to the growing shortage of domestic help, and also the extra service that America must depend on her army of housekeepers to perform - inside the home and out of it.

Hoosier makes that possible by cutting kitchen work in half.

Consider the Chicago woman who made a record knitting socks, sweaters and helmets for the Red Cross in addition to doing her own housework! This woman used a kitchen cabinet because she knew it would help her do the hardest part of housework in the easiest way and in the shortest time.

Hoosier excels all others in convenience because it is scientifically built. The partitionless work-space above the sliding table top is wide and un-cluttered. This is vital to convenience because 90 per cent. of your work falls here.

Come in at once to see the new Hoosier models before our allotment is all taken. Our popular purchase plan puts this cabinet within reach of any home. Delivered for a small deposit - balance in convenient amounts.
